PERIODICAL GUIDE FOR COMPUTERISTS

An Index of Personal Computing Magazine Articles
January 1980 - December 1981

This is a special edition of "The Periodical Guide for Computerists." It includes over 10,000 entries from 24 computer and electronics magazines published in 1980 and 1981. Although the "Computerist" has been published since 1976, this is the first edition produced by Applegate Computer Enterprises, a small publishing firm located in rural southern Oregon, using a NorthStar microcomputer to compile and generate index publications.

The "Computerist" is designed to give you easy access to information that would otherwise be hard to locate. Subjects are arranged by category according to MAJOR SUBJECT HEADINGS and SUBHEADINGS. The listings are arranged alphabetically and the index is cross - referenced, so you may find the article or information you are looking for in more than one place. For example, articles about game programs are listed under "Software/Games" as well as "Games/ Software." And, the article "Low Cost Expansion for the TRS-80" can be located under "Microcomputers/TRS80" or "Hardware/Interfaces."

As a further aid to using the index, you should note that each entry includes ARTICLE NAME, AUTHOR, MAGAZINE and ISSUE, PAGE NUMBER and a special coding, indicating TYPE of listing. On page vii you will find a list of abbreviations used. Another page to make note of is page 136, MAGAZINE NAMES and ADDRESSES, for subscription information as well as to check the notation regarding magazine orientation e.g. Apple-users, Business systems.

Ellen & Rick Levine, A.C.E.
Applegate, Oregon
January 10, 1982

For information regarding other publications and/or back copies of THE PERIODICAL GUIDE FOR COMPUTERISTS, 1975-76,1977,1978 & 1979 @ $5 each, contact: APPLEGATE COMPUTER ENTERPRISES
